Cihat Çıtak

Senior Game Developer | Unity & C# | Mobile FPS, Puzzle & Casual Games

Istanbul, Turkey • +90 553 081 72 92 • cihatcitakc@gmail.com • cihatcitak.github.io • LinkedIn • GitHub

WORK EXPERIENCE

Mar 2026 – Present

Game Developer, Vertigo Games · Istanbul

- Ship gameplay features for Critical Strike CS and Polygun Arena, two live mobile FPS titles with 200M+ downloads, built in Unity with real-time multiplayer on Photon and Photon Fusion.
- Implement core combat systems with client-side prediction and state sync, keeping networked fights fair and responsive.
- Profile and optimize networked gameplay code under real match conditions, reducing CPU spikes across a global device spread.
- Track and fix live gameplay issues through Sentry, shipping fixes without disrupting the live service.

Aug 2022 – Dec 2025

Senior Game Developer, NARCADE · Istanbul

- Owned core gameplay mechanics for Unity puzzle titles (Zen Master, Garden & Home, Royal Decor), shipping features from concept to live release.
- Architected modular gameplay systems with Zenject, UniTask and Addressables, reused across multiple titles to speed up new game production.
- Created and balanced 30+ gameplay items and boosters, tuning mechanics and feedback to drive long-term player progression.
- Optimized draw calls, GC allocations and memory to hold a stable 60 FPS down to low-end 2GB RAM Android devices.
- Built custom Unity editor tools and level editors, cutting level creation time from hours to minutes for design and QA.
- Mentored junior developers and ran code reviews, setting shared architecture and coding standards for the gameplay team.

Mar 2022 – Aug 2022

Game Developer, Yolo Game Studio · Istanbul

- Prototyped 10+ hyper-casual and puzzle concepts in Unity on 5-10 day cycles, evaluating gameplay clarity and CPI performance.
- Integrated analytics and ad SDKs (Firebase, GameAnalytics, Adjust, AdMob, Unity Ads), enabling data-driven iteration on 5 shipped titles.

Sep 2021 – Feb 2022

Game Developer, Star Hunter Games · Istanbul

- Built core gameplay mechanics and loops with Unity physics, animation and mobile input, shipping Bunker Rush 3D, Ramboat Loot and Mom Simulator 3D from concept to live release.

EDUCATION

2020

Bachelor of Science in Computer Engineering (English), University of Karabük

SKILLS

Engine & Languages	Unity • C# • .NET
Multiplayer & Networking	Photon • Photon Fusion • PlayFab • Client-Side Prediction • State Synchronization
Architecture	SOLID • Dependency Injection • Event-Driven Systems • Design Patterns
Libraries & Tools	Zenject • UniTask • R3 (UniRx) • DOTween • Addressables • ScriptableObjects • Odin Inspector • Git
Performance	Unity Profiler • Memory & GC Optimization • Draw Call Optimization • Low-End Device Optimization
Mobile & LiveOps	iOS & Android • Build Pipelines • LiveOps • Crash Monitoring (Sentry) • CPI Prototyping • Agile/Scrum
Monetization & Analytics	AdMob • Unity Ads • Firebase • GameAnalytics • Adjust
AI Tools	Claude Code • Cursor • GitHub Copilot
